Clean and dry

Don't leave ANY food waste. It corrupts the purity of the saleable recycling and makes batches go into the landfill instead.

No plastic bags

Dump recycling loose and out of plastic bags.

No narrow or small items

Narrow and small items under 2" slip through the cracks of machines and interrupt the recycling process. Caps are OK if you screw them back onto the container.

When in doubt, throw it out

Non-recyclables in the recycling bin ultimately hurt recycling programs. Don't "wish recycle"; when you're not sure, throw it in the garbage.

Reduce, Reuse, Compost

Remember to reduce consumption, reuse often and compost as much as possible. Curbside composting service: [Finger Lakes CompostN](#)
